Ahonsi Clever

Animation, AI Automation and Design.

Summary

I am a storyteller and creator specializing in characters and worlds that resonate. From cinematic 2D trailers to dynamic content for TikTok and YouTube, I focus on one thing: Impact.

I don’t just animate; I build visual experiences that have reached over 350,000 people globally. In today’s evolving AI landscape, I believe that technical workflows and production pipelines—for any business, not just creative ones—require systems built for scalability and sustainability.

By merging professional animation with advanced technical workflows (n8n, LLMs) and an analytical mind sharpened by my B.Sc. in Statistics, I build content engines that are as efficient as they are impactful not only for the creative sector but for any industry looking to scale.

Why work with me? I’m more than an animator, I'm a creator who builds the systems that deliver it.

My Specialized Toolkit:

Animation: Moho 14 Pro || Clip Studio Paint || Adobe After Effects.

Automation: AI LLMs (Claude, Gemini etc.) || n8n || GoHighLevel || Notion.

Design: Photoshop

Experience

ABRB Consulting, LLC
AI Automation Internship
April 2026 - Present (2 months)
Virginia, United States

Sprint 1 of the Ballet Ticket Sales Engine: The sprint focused on building a resilient, AI-powered email automation pipeline that integrates GoHighLevel (GHL), n8n, Google Gemini, Gmail, and Google Sheets into a single, observable workflow.
All three major deliverables—pipeline architecture, advanced data engineering, and operational audit readiness—were completed and verified through live testing

Penmob Creative Studios
Art Director & Lead Storyboard Artist
October 2025 - Present (8 months)

Developing the end-to-end creative vision for The New Snack City Show that reached an audience of 350,000+ viewers.
Translated core concepts into detailed visual scripts and storyboards, ensuring narrative flow and high audience retention.
Managed the visual identity of the project, ensuring all assets were consistent, engaging, and optimized.

Nsibidi Fables
1 year 5 months

Compositor
September 2025 - Present (9 months)
Lagos

I specialize in the final and most critical stage of the animation pipeline: compositing.
I take separate visual elements—character animation, environments, effects, and lighting—and integrate them into cohesive, cinematic frames ready for final delivery.
Seamlessly combining 2D character animation with backgrounds and generated environments to create a unified and believable scene.

Enhancing flat animation layers with rim lighting, highlights, and environmental light interactions to simulate volume and dimensionality.

Applying depth-of-field, blurs, haze, and lens effects to guide viewer focus and create cinematic scale.

In-between Animator
January 2025 - March 2026 (1 year 3 months)
Lagos

Created transitional frames between key poses to ensure smooth and fluid character motion in 2D animation.
Followed timing charts provided by lead animators to maintain accurate pacing and spacing of movement.
Maintained consistency in character style, proportions, and motion across frames.
Strengthened understanding of animation principles and production workflows, thus building a solid foundation for advancement to key animation roles.
Contributed to "Amanirenas: The Kush Empire", an animated series highlighting the story of an African queen's trials in the ancient Kush Empire.

Fiverr
Freelance Animator
July 2023 - June 2025 (2 years)

This was my major freelancing platform where I worked. Here my gigs are not only on centered on 2D animation alone but generating creative guides for beginners to learn how to draw and hosting classes that teach the basics of drawing in the anime art style.

Education

University of Benin
Bachelor of Science - Statistics · (2019 - 2022)

Del-York Creative Academy
Certificate of Participation, Introduction to Animation and Post Production · (January 2025 - March 2025)
